Learning Action Plan

Use the Unity Learning Action Plan to help you set your goals and figure out how you can best achieve them. Whether you are taking an in-person workshop, online course or building a project, mapping out what you can do to build your skills will help you reach your goals. Every time you engage in a learning experience, be sure to keep track of your progress.

Ultimate Unity Goal

Set the goal of what you ultimately want to create with Unity and identify the objectives you have for this learning experience today tied to your goal.

30-60-90 Day Plan to Reach Ultimate Goal

A 30-60-90 day plan helps you identify the resources and skills you need to reach your Ultimate Goal, and to set a time frame for doing so. Answer the following questions for each time frame and add action items to get you on your way. As you fill out your plan, consider the following:

- **What you can do now and what you want to be able to do in 30-60-90 days.**

- **The objectives above and how the action items will help you meet them.**

- **Key skills you learned that you will apply to your next project or Ultimate Goal.**

- **Key things you learned that you need to practice or where you want to "dive deeper."**

- **Any pain points or skill sets you found challenging and your plans to overcome them.**

- **Remembering to continuously review and iterate your action plan as you learn new skills so you can reach your Ultimate Unity Goal!**
